

# Calamos Global Growth and Income Fund

## OVERVIEW

The fund invests primarily in global equity and convertible securities in an attempt to balance risk/reward while providing growth and income.

## KEY FEATURES

- » Combines equity and convertible holdings in order to limit downside risk while potentially capturing upside equity participation
- » Provides a core holding option that aims to maintain a consistent risk posture throughout the market cycle
- » Seeks to participate in the upside movements of the global equity market while lessening the damage of down periods

## PORTFOLIO FIT

The fund can provide a long-term core allocation to global equities with the potential for lower volatility over market cycles.

## FUND TICKER SYMBOLS

## Notable Outperformance vs. Bonds in the Face of Rate Increases

The chart below shows fund's outperformance versus the Bloomberg Barclays Global Aggregate Bond Index during periods when the 10-year Treasury bond yields rose more than 100 basis points.

Data as of 12/31/17. Rising rate environment periods from troughs to peak from October 1998 to December 2016. A basis point equals 1/100th of 1%

## GROWTH OF \$10K: OUTPERFORMANCE SINCE INCEPTION

The chart below shows how a hypothetical \$10,000 investment in the fund outperformed the benchmark MSCI ACWI Index since the fund's inception.

Performance is for the Fund's Class A shares at net asset value and does not include the Fund's maximum front-end sales charge of 4.75%—had it been included, the Fund's return would have been lower. Results are before taxes on fund distributions and assume reinvestment of dividends and capital gains. Index data shown is from 8/31/96, since comparative index data is available only for full monthly periods. Source: State Street Corporation and Lipper, Inc.

Performance data quoted represents past performance, which is no guarantee of future results. Current performance may be lower or higher than the performance quoted. The principal value and return of an investment will fluctuate so that your shares, when redeemed, may be worth more or less than their original cost. Performance reflected at NAV does not include the Fund's maximum front-end sales load of 4.75%. Had it been included, the Fund's return would have been lower. For the most recent month-end fund performance information visit [www.calamos.com](http://www.calamos.com).

Calendar year returns measure net investment income and capital gain or loss from portfolio investments for each period specified. Average annual total return measures net investment income and capital gain or loss from portfolio investments as an annualized average. All performance shown assumes reinvestment of dividends and capital gains distributions. The Fund also offers Class C shares, the performance of which may vary. In calculating net investment income, all applicable fees and expenses are deducted from the returns.

Class I shares are offered primarily for direct investment by investors through certain tax-exempt retirement plans (including 401(k) plans, 457 plans, employer-sponsored 403(b) plans, profit sharing and money purchase pension plans, defined benefit plans and non-qualified deferred compensation plans) and by institutional clients, provided such plans or clients have assets of at least \$1 million. Class I shares may also be offered to certain other entities or programs, including, but not limited to, investment companies, under certain circumstances.

There can be no assurance that the Fund will achieve its investment objective.

Bond credit quality allocation reflects the higher of the ratings of Standard & Poor's Corporation or Moody's Investors Service, Inc. Ratings are relative, subjective and not absolute standards of quality, represent the opinions of the independent, Nationally Recognized Statistical Rating Organizations (NRSRO), and are adjusted to the Standard & Poor's scale shown. Ratings are measured using a scale that typically ranges from AAA (highest) to D (lowest). The security's credit rating does not eliminate risk. The table excludes equity securities, cash and cash equivalents. For more information about securities ratings, please see the Fund's Statement of Additional Information at [www.calamos.com](http://www.calamos.com). Additional information on ratings methodologies are available by visiting the NRSRO websites: [www.standardandpoors.com](http://www.standardandpoors.com) and [www.moody.com](http://www.moody.com).

Portfolios are managed according to their respective strategies which may differ significantly in terms of security holdings, industry weightings, and asset allocation from those of the benchmark(s). Portfolio performance, characteristics and volatility may differ from the benchmark(s) shown. Please refer to Important Risk Information.

## NOTES

Annualized standard deviation is a statistical measure of the historical volatility of a mutual fund or portfolio, usually computed using 36 month returns. Beta is a historic measure of a portfolio's relative volatility, which is one of the measures of risk; a beta of 0.5 reflects half the market's volatility as represented by the strategy's primary benchmark, while a beta of 2 reflects twice the volatility. Debt/capital ratio is a measure of a company's financial leverage, calculated as the company's debt divided by its total capital. Portfolio turnover is the percentage of assets in a portfolio that changed over a certain period, often a year; higher turnover indicates greater buying and selling activity. ROIC (return on invested capital) measures how effectively a company uses the money investing in its operations, calculated as a company's net income minus any dividends divided by the company's total capital. The Bloomberg Barclays Global Aggregate Bond Index provides a broad-based measure of the global investment-grade fixed-rate debt markets. It is comprised of the U.S. Aggregate, Pan-European Aggregate, and the Asian-Pacific Aggregate Indexes. It also includes a wide range of standard and customized sub-indices by liquidity constraint, sector, quality and maturity. Morningstar World Allocation funds seek to provide both capital appreciation and income by investing in three major areas: stocks, bonds and cash. While these portfolios do explore the whole world, most of them focus on the U.S., Canada, Japan and the larger markets in Europe. It is rare for such portfolios to invest more than 10% of their assets in emerging markets. These portfolios typically have at least 10% of assets in bonds, less than 70% of assets in stocks,
