INVESTMENT TEAM

Global Co-Chief Investment Officers John P. Calamos, Sr., and Gary D. Black lead an integrated team of experienced investment professionals.

'Current Annualized Distribution Rate is the Fund's distribution, expressed as an annualized percentage of the Fund's current market price per share. Distribution rate may vary. Under the Fund's level rate distribution policy, distributions paid to common shareholders may include net investment income, net realized short-term capital gains and return of capital. When the net investment income and net realized short-term capital gains are not sufficient, a portion of the level rate distribution will be a return of capital. In addition, a limited number of distributions per calendar year may include net realized long-term capital gains. Distributions are subject to re-characterization for tax purposes after the end of the fiscal year. For a detailed breakdown of the Fund's distributions, see next page.

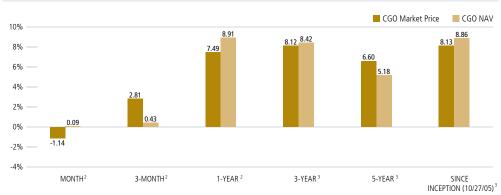

Fund Objective

The Fund seeks total return through a combination of capital appreciation and current income by investing in a globally diversified portfolio of equities, convertible securities and below-investment-grade (high yield) fixed income securities.

Investor Profile

Taking a defensive approach to global growth, the Fund seeks to offer investors global equity participation and an attractive monthly distribution. By combining equities, convertible bonds and higher-yielding corporate securities from around the globe, the Fund seeks to generate capital gains as well as income, taking advantage of its flexibility to manage risk and reward over the course of the global economy's cycle.

PERFORMANCE

- ² Total return measures net investment income and capital gain or loss from portfolio investments, assuming reinvestment of income and capital gain
- ³ Average annual return measures net investment income and capital gain or loss from portfolio investments as an annualized average, assuming reinvestment of income and capital gain distributions.

CALENDAR YEAR RETURNS

YTD 2013	2012	2011	2010	2009	2008	2007	2006
Market Price 7.00%	9.88%	1.30%	10.74%	67.08%	-44.51%	20.68%	28.10%
NAV 4.93	12.85	-2.21	13.83	40.41	-35.14	22.81	23.05

Performance data quoted represents past performance, which is no guarantee of future results. Current performance may be lower or higher than the performance quoted. Portfolios are managed according to their respective strategies which may differ significantly in terms of security holdings, industry weightings, and asset allocation from those of the benchmark(s). Portfolio performance, characteristics and volatility may differ from the benchmark(s) shown.

You can purchase or sell common shares daily. Like any other stock, market price will fluctuate with the market. Upon sale, your shares may have a market price that is above or below net asset value and may be worth more or less than your original investment. Shares of closed-end funds frequently trade at a discount which is a market price that is below their net asset value.

Please refer to back page for important notes.

the ratings of Standard & Poor's Corporation; Moody's Investors Service, Inc. or Fitch, Inc. Ratings are relative, subjective and not absolute standards of quality, represent the opinions of the independent Nationally Recognized Statistical Rating Organizations (NRSRO), and are adjusted to the Standard & Poor's scale shown. Ratings are measured using a scale that typically ranges from AAA (highest) to D (lowest). In addition, CAL has assigned its own ranking to the "unrated bonds" based on its fundamental and proprietary investment process and has years of experience actively managing risk. The security's credit rating does not eliminate risk. The table excludes equity securities, cash and cash equivalents. For more information about securities ratings, please see the Fund's Statement of Additional Information at www.calamos.com. Additional information on ratings methodologies are available by visiting the NRSRO websites: www.standardandpoors.com, www.moodys.com, and www.fitchratings.com.

⁶ Interest expense and related fees on payments made to the Fund's outstanding credit facility.

Investments by the Fund in lower-rated securities involve substantial risk of loss and present greater risks than investments in higher rated securities, including less liquidity and increased price sensitivity to changing interest rates and to a deteriorating economic environment. Fixed income securities are subject to interest-rate risk;

as interest rates go up, the value of debt securities in the Fund's portfolio generally will decline. There are certain risks associated with an investment in a convertible bond such as default risk—that the company issuing a convertible security may be unable to repay principal and interest—and interest rate risk—that the convertible may decrease in value if interest rates increase.

Level Rate Distribution Policy is an investment company's commitment to common shareholders to provide a predictable, but not assured, level of cash flow. Market Price refers to the price at which shares of the fund trade in the market. NAV or Net Asset Value refers to the net value of all the assets held in the fund. IPO Price refers to the initial public offering price for shares of the fund.
