

First Quarter 2012 Report

Global Equity Fund

CALAMOS

FUND INFORMATION

A share ticker: CAGEX
 I share ticker: CIGEX
 Category: Global Growth
 Inception date: 3/1/2007
 Net assets: \$246.6 million
 Objective: Long-term capital growth
 Benchmarks: MSCI World Index

FUND STRATEGY

The fund invests primarily in a globally diversified portfolio of equity securities issued by small, midsize and large companies that we believe offer the best opportunities for growth. The fund may invest in securities of issuers in the emerging markets.

- > Active management blending global investment themes and fundamental research
- > Seeks quality companies with sustainable growth
- > Flexibility to pursue best risk/reward opportunities across capitalization and sector

Key Drivers of Performance

- > The fund outperformed in the first quarter and added value through overall security selection.
- > Value was added through selection within the information technology, consumer staples, telecommunication services, health care and industrials sectors.

Market and portfolio overview

- > The global equity market posted strong gains during the quarter, which was characterized by an increase in appetite for risk – a reversal of the trend late last year.
- > Best performing sectors for the quarter included the information technology, financials, consumer discretionary and industrials sectors.
- > We believe large multinational companies with globally diversified revenues and access to capital are poised to benefit from current secular and cyclical trends.

AVERAGE ANNUAL RETURNS

	3-MONTH	YTD	1-YEAR	3-YEAR	5-YEAR	SINCE INCEPTION
Calamos Global Equity Fund

Performance data quoted represents past performance, which is no guarantee of future results. Current performance may be lower or higher than the performance quoted. The principal value and return of an investment will fluctuate so that your shares, when redeemed, may be worth more or less than their original cost. Performance reflected at NAV does not include the Fund's maximum front-end sales load of 4.75% had it been included, the Fund's return would have been lower. For the most recent fund performance information visit Calamos.com.

Calendar year returns measure net investment income and capital gain or loss from portfolio investments for each period specified. Average annual total return measures net investment income and capital gain or loss from portfolio investments as an annualized average. All performance shown assumes reinvestment of dividends and capital gains distributions. The Fund also offers Class B and C Shares, the performance of which may vary.

Class I shares are offered primarily for direct investment by investors through certain tax-exempt retirement plans (including 401(k) plans, 457 plans, employer-sponsored 403(b) plans, profit sharing and money purchase pension plans, defined benefit plans and non qualified deferred compensation plans) and by institutional clients, provided such plans or clients have assets of at least \$1 million. Class I shares may also be offered to certain other entities or programs, including, but not limited to, investment companies, under certain circumstances.

Calamos Global Equity Fund First Quarter 2012 Report

Quarterly Attribution Analysis

CONTRIBUTORS

Information Technology. Strong selection and an overweight position was the biggest contributor to relative returns during the quarter. IT was the strongest performing sector within the index during the quarter. Selection within the computers & peripherals and software industries was notably positive during the quarter.

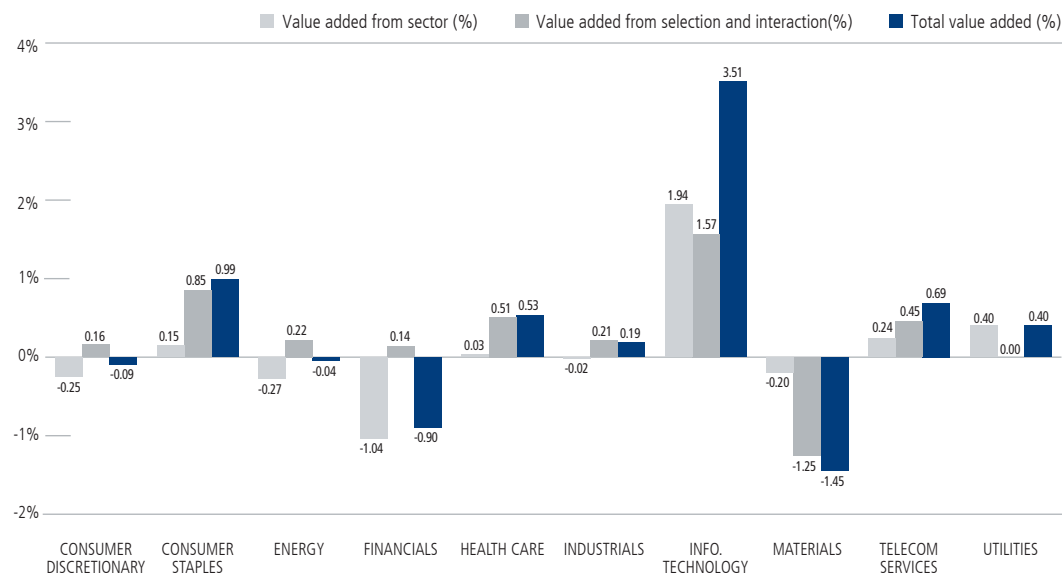

Consumer Staples. Strong selection and an underweight position added value as names within the food & staples retailing industry outperformed those within the index. Names within the consumer staples sector tend to be more defensive and exhibit lower growth characteristics, and the sector's return trailed others in the index.

DETRACTORS

Materials. The portfolio's relative selection and overweight position detracted value. The portfolio's allocation to the gold industry was detrimental to performance, as these firms incurred the rising cost of extraction during the period. We continue to believe the sector will be supported by increased demand for resources from emerging market regions along with reflation efforts and accommodative global central bank policies.

Financials. An underweight allocation detracted value in the quarter. We remain cautious here and have generally avoided the sector due to increased regulations globally and significant business risks remaining in many financial institutions. Recently, we have favored investment in globally diversified asset managers and selected insurers with lower underlying credit risk.

GLOBAL EQUITY FUND VERSUS MSCI WORLD INDEX

SECTOR WEIGHTS (AVERAGE % WEIGHT DURING THE QUARTER)

Global Equity Fund	6.42	6.85	14.27	2.24	11.25	5.25	35.49	16.03	2.19	0.00

Calamos Global Equity Fund First Quarter 2012 Report

2011 Attribution

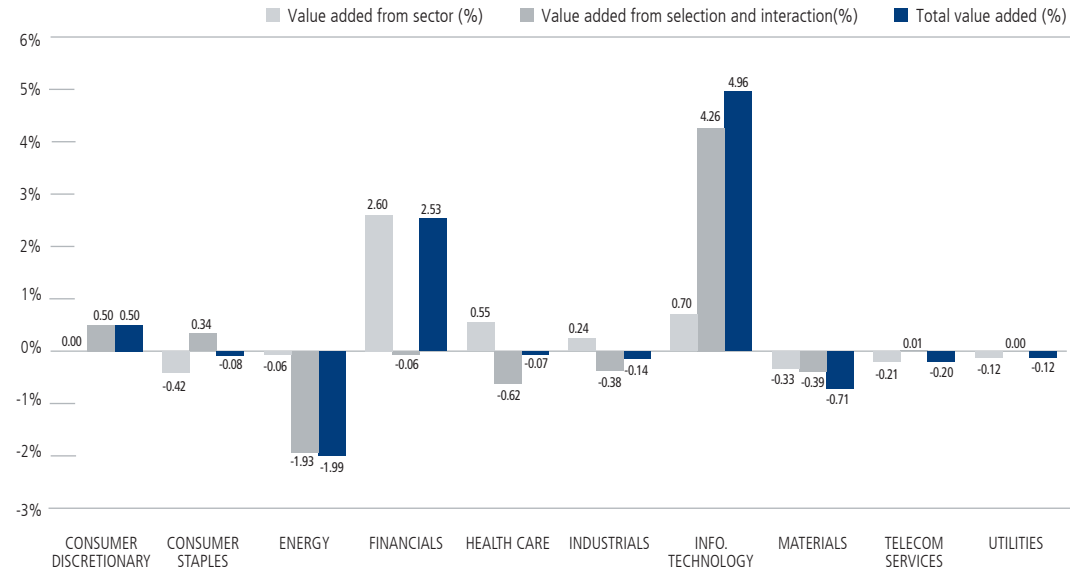

KEY DRIVERS OF PERFORMANCE

In 2011, the fund outperformed the benchmark, led by strong selection within information technology and an underweight position in the financial sector. Within IT, an overweight position added value and stock selection was positive and significantly outperformed the index. Selection within the software and semiconductors industries was notably additive. An underweight position to the financial sector also contributed to relative returns as this was the worst performing sector within the index during the one year period.

For the calendar year, weak selection in the energy and materials sectors detracted value. Within energy, our holdings within the oil, gas and consumable fuels industry lagged those of the index. Within the materials sector, our exposure to the metals & mining industry hampered relative returns.

From a geographic perspective, holdings within the U.K., France and Denmark added to relative returns during the 12-month period. An underweight position to Japan also contributed to performance. The portfolio's holdings within emerging markets, particularly within China and Brazil, added significant value during the period. Holdings within Canada (particularly exposure to precious metals holdings) and Taiwan detracted value during the period.

Calamos Global Equity Fund First Quarter 2012 Report

Portfolio Holdings – Contributors

FIRM NAME	DESCRIPTOR	% OF FUND	FIRM PROFILE	ANALYSIS
QUALCOMM, Inc.	Contributor	4.7%	<p>QUALCOMM develops and licenses wireless technology and manufactures semiconductors for mobile phones. The company's key patents involve CDMA technology, which is a primary standard in wireless communications and is licensed to most major handset makers. QUALCOMM also has several other product lines under development, including platforms for mobile banking and mobile broadcast television.</p>	<p>The shift toward smart phones represents a clear secular growth opportunity and QUALCOMM is in a great position to benefit from this. The company's strong intellectual property portfolio and semiconductor expertise in 3G and 4G wireless technologies should continue to fuel growth for the next several years. Additionally, the company generates the majority of its revenues overseas and has significant exposure to the rapidly growing emerging market economies. During the time period the company issued strong future EPS guidance. The quarterly dividend was also increased and a stock repurchase program was announced.</p>
Novo-Nordisk, A/S – Class B	Contributor	3.6%	<p>Novo Nordisk is a pharmaceutical company focused on diabetes care whose goal is to defeat diabetes by finding better methods of diabetes prevention, detection, and treatment. Besides being one of the world's leading producers of insulin, the company also makes insulin analogues, injection devices, and diabetes education materials.</p>	<p>Novo Nordisk holds the number one position in the world for insulin, and the company's modern insulin products also hold the number one position. The company also holds the number one position in the world for insulin delivery products. Diabetes care products account for the majority of the company's sales. In addition, Novo Nordisk also has products in the areas of hemostasis management (blood clotting), human growth hormone, and hormone replacement therapy. Novo is growing its emerging market sales exposure and currently holds the majority of the China insulin market. It is estimated that 113 million people within emerging market countries are affected by diabetes, and this number could rise to 170 million+ by 2030. Novo has a strong pipeline of products, including a potential product that will enable patients to take insulin orally instead of through injection.</p>

Calamos Global Equity Fund First Quarter 2012 Report

Portfolio Holdings – Detractors

FIRM NAME	DESCRIPTOR	% OF FUND	FIRM PROFILE	ANALYSIS
Newmont Mining Corp.	Detractor	1.69%*	Newmont in Denver, Colorado, is one of the world's leading gold mining companies. Although the majority of the business is focused on gold production, approximately 10% of revenues come from copper production. The company is among the largest gold producers in the world and has broad geographic diversification.	Gold mining related companies traded off during the quarter in response to rising costs of extraction during the period which will negatively impact profit margins. In addition, during this "risk on" market environment, many other precious metals and mining companies performed well. We consider gold stocks a global hedge against uncertain financial markets and currency fluctuations.
Genomma Lab Internacional, SAB de CV	Detractor	0.77%*	Genomma Lab Internacional develops and sells various over the counter pharmaceutical and personal care product within Mexico and internationally. The company offers a variety of brands and products including , but not limited to, generic drugs, anti-acne products, flu treatments, shampoos, multivitamins, headache, and joint pain.	During the quarter, the stock traded off in response to concerns regarding a hostile bid the company made in order to broaden its exposure into other markets. We continue to monitor developments on this potential acquisition. This continues to be a play on the emerging market consumer as the company has a very dynamic advertising model primarily targeted to Mexican consumers.

Calamos Global Equity Fund First Quarter 2012 Report

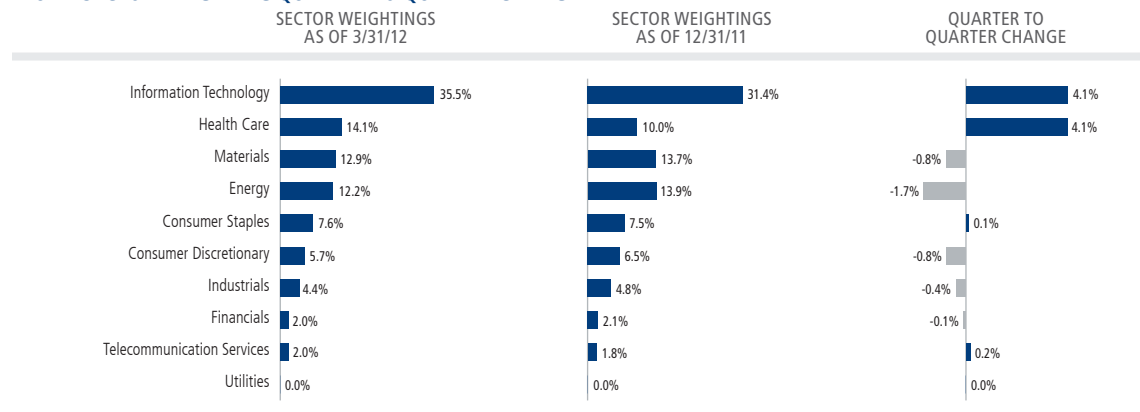

Positioning

Health Care: The allocation slightly increased during the quarter as we were marginally reducing risk within the portfolio. Because health care spending is not as dependant on robust economic growth, we view the portfolio's health care holdings as providing defensive characteristics. Our focus within this sector remains on companies that have displayed strong corporate performance, healthy cash flows and strong fundamentals.

Information Technology: This sector remains our largest allocation within the portfolio and during the time period we slightly increased our exposure. As mentioned above, we continue to favor IT due to its high growth potential as well as clean balance sheets and attractive valuations. IT also continues to benefit from many of the long-term global secular themes we have identified, including consumer demand for products and services that provide access to information and entertainment.

Energy and Materials: During the quarter our allocations to the energy and materials sectors was reduced. While we continue to have a favorable view towards these sectors, we wanted to reduce some of the cyclical within the portfolio. While these sectors were reduced, we continue to believe that the reflation theme will provide some long-term opportunities, given strong signals from the Federal Reserve and other global central banks that they would remain accommodative and provide a backstop for the markets.

Calamos Global Equity Fund First Quarter 2012 Report

Market Commentary

FIRST QUARTER REVIEW

Global equities posted strong gains during the first quarter of the year. The global equity market, as measured by the MSCI World Index, increased by 11.72% (in USD terms, 11.34% in local currency terms) over the three-month period. The quarter was characterized by an increase in appetite for risk – a reversal of trend compared with late last year.

The U.S. equity market returned 12.59%, as measured by the S&P 500 Index during the quarter, completing its biggest rally to start a year since 1998. During the quarter, economic data from the U.S. continued to improve, including strong gains in payrolls, rising manufacturing activity and renewed confidence among both individuals and businesses.

Not surprisingly, Europe slightly lagged the developed equity market during the time period, returning 10.81% (in USD terms) as measured by the MSCI Europe Index. Although Europe continues to remain a focal point within the global economy and the situation is far from resolved, the perception of stability somewhat alleviated investor anxiety.

Emerging markets posted strong returns during the quarter and outperformed developed market regions. Emerging markets, as measured by the MSCI Emerging Markets Index, returned 14.14% (in USD terms, 10.76% in local currency terms) during the quarter. Emerging market countries, particularly the larger BRIC economies, are still the predicted main source of future global growth. Much attention is being paid to their ability to sustain high growth rates in the face of a global economic slowdown and potentially higher inflation.

OUTLOOK

“Risk-on” won out during the first quarter, as global reflation efforts and brighter economic data helped propel the equity markets upward. The S&P 500 Index posted its strongest quarterly start in more than a decade. Reflation sectors continued to perform well.

Economic data in the U.S. supports the view that a mild recovery is underway. There have been improvements in leading indicators, as well as signs of a bottom in the housing market. Overall, the U.S. economic engine—excluding the government portion of GDP—is demonstrating resilience. However, higher oil prices, inventory surges, weak velocity of money and a drawdown in savings during the fourth quarter are headwinds, heightened by uncertainty surrounding taxes, health care costs and other regulations. We maintain our expectation for quarters that feel like recovery, followed by periods that feel like retreat. Asia and Europe are showing signs of healing, though less robust than in the U.S. And, as in the U.S., the trajectory remains unclear. In Europe, real progress toward structural change has been elusive, Japan continues to struggle with soaring debt, and China faces increased financial strain and inflation. We would not be surprised to see the yen and euro weaken in the next year.

The global markets have responded to quantitative easing and the liquidity surge, but until the major world economies get back to more reasonable debt levels, we see global economic growth remaining below historic averages. We believe that in the U.S., the Fed will do anything to avoid a debt devaluation cycle. This means printing money, repurchasing debt and holding government rates below inflation and GDP growth. The implications of this include inflation in oil prices and imported goods as dollar devaluation occurs, and the potential for exporting inflation to emerging economies tied to the U.S. dollar or the Chinese yuan. Currency wars will not go away in this environment, creating hindrances to free trade and other economic liberties.

Nonetheless, we remain optimistic about the growth potential afforded by globalization. Our active and independent approach is leading us to opportunities supported by secular trends, such as the growth of an emerging market middle class and the ongoing push for enhanced business productivity in a globally competitive environment. Cyclical trends, notably reflation, also provide a tailwind for a range of commodity companies. We believe large multinationals with global access to capital, distribution networks, marketing and production should command premium business valuations. We expect companies in technology and energy to be particularly well-positioned over the next decade.

Portfolios are managed according to their respective strategies which may differ significantly in terms of security holdings, industry weightings, and asset allocation from those of the benchmark(s). Portfolio performance, characteristics and volatility may differ from the benchmark(s) shown.

NOTES (ALPHABETICAL)

Alpha is the measurement of performance on a risk adjusted basis. A positive alpha shows that performance of a portfolio was higher than expected given the risk. A negative alpha shows that the performance was less than expected given the risk. Annualized Standard Deviation—A statistical measure of the historical volatility of a mutual fund or portfolio. Beta—Is a historic measure of a fund's relative volatility, which is one of the measures of risk; a beta of 0.5 reflects 1/2 the market's volatility as represented by the Fund's primary benchmark, while a beta of 2.0 reflects twice the volatility. Information Ratio is the measurement of the performance returns of a portfolio against the performance volatility of an index or benchmark. The information ratio is generally used as a gauge to measure the ability of a portfolio to generate excess returns of the index or benchmark. PEG ratio is a stock's price/earnings ratio divided by estimated earnings growth rate in the next year; a lower PEG indicates that less is being paid for each unit of earnings growth. Price/book ratio is the stock's capitalization divided by its book value. Price/earnings ratio is the current stock price over trailing 12-month earnings per share. Price/sales ratio is a stock's capitalization divided by its sales over the trailing 12 months. Debt/Capital Ratio is a measure of a company's financial leverage, calculated as the company's debt divided by its total capital. ROIC (return on invested capital) measures how effectively a company uses the money invested in its operations, calculated as a company's net income minus any dividends divided by the company's total capital. EPS growth (5 years) represents the historical weighted earnings per share growth of holdings. R-squared is a mathematical measure that describes how closely a security's movement reflects movements in a benchmark. MSCI World Index is a market capitalization weighted index composed of companies representative of the market structure of developed market countries in North America, Europe, and Asia/Pacific region. The S&P 500 Index is generally considered representative of the U.S. stock market.

Unmanaged index returns assume reinvestment of any and all distributions and, unlike fund returns, do not reflect fees, expenses or sales charges. Investors cannot invest directly in an index.

Important Risk Information. An investment in the Fund(s) is subject to risks, and you could lose money on your investment in the Fund(s). There can be no assurance that the Fund(s) will achieve its investment objective. Your investment in the Fund(s) is not a deposit in a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation (FDIC) or any other government agency. The risks associated with an investment in the Fund(s) can increase during times of significant market volatility. The Fund(s) also has specific principal risks, which are described below. More detailed information regarding these risks can be found in the Fund's prospectus.

The principal risks of investing in the Calamos Global Equity Fund include: equity securities risk, growth stock risk, value stock risk, foreign securities risk, emerging markets risk, small and mid-sized company risk and portfolio selection risk.

As a result of political or economic instability in foreign countries, there can be special risks associated with investing in foreign securities, including fluctuations in currency exchange rates, increased price volatility and difficulty obtaining information. In addition, emerging markets may present additional risk due to potential for greater economic and political instability in less developed countries.

Before investing, carefully consider the Fund's investment objectives, risks, charges and expenses. Contact 800.582.6959 for a prospectus containing this and other information. Read it carefully.
