## OVERALL

### MORNINGSTAR RATING™†

among 97 USD Flexible Allocation funds  
The fund's Class A US \$ Accumulating shares received 3 stars for 3 years and 3 stars for 5 years out of 97 and 55 USD Flexible Allocation funds, respectively, for the period ended 31/3/13.

## OBJECTIVE

The fund seeks high long-term total return through growth and income.

## INVESTMENT STRATEGY

The fund invests in a globally diversified portfolio of equity, convertible and fixed income securities without regard to market capitalization. At least 40% of assets are in securities of non-U.S. issuers. The fund utilizes these different types of securities to balance risk and reward in providing growth and income.

## BENCHMARK

MSCI World Index

## INVESTMENT PROCESS

The fund's investment team employs an investment process that considers global macro economic factors and investment themes. The team conducts both fundamental and quantitative research to evaluate the source, sustainability and risk of investment opportunities. The team manages a diversified portfolio monitoring and managing risk at the portfolio and individual security level.

## INVESTMENT TEAM

Global Co-Chief Investment Officers John P. Calamos, Sr., and Gary D. Black lead an integrated team of experienced investment professionals.

## FIRM DESCRIPTION

Calamos Investments® is a global investment management firm with \$29.3 billion in total assets\* that has served the needs of institutional and individual investors for three decades. We offer a range of global investment solutions—equities, fixed income and alternatives—to work within your multi-asset allocation framework to achieve the goals of your investment program.

\*Data as of 31/3/13. Total Assets includes assets under management as well as \$939 million for which the company provides model portfolio design and oversight.

## A Core Global Allocation with Potential for Lower Volatility

- » Active management blending global investment themes and fundamental research
- » Seeks to provide upside participation in equity markets with less exposure to downside than an equity-only portfolio over a full market cycle
- » Seeks to maintain a balance of risk and reward over a market cycle by investing in equity, convertible securities and fixed income

**Lower Volatility:** Since inception, the fund has lower volatility and beta than the benchmark.

### BETA

### STANDARD DEVIATION

Beta is an historic measure of a fund's relative volatility, which is one of the measures of risk; a beta of 0.5 reflects 1/2 the market's volatility as represented by the fund's primary benchmark, while a beta of 2.0 reflects twice the volatility. Standard deviation is measure of volatility.

## PERFORMANCE: HOW A HYPOTHETICAL \$10,000 INVESTMENT GREW

The chart below shows how a hypothetical \$10,000 investment in the fund performed vs. the MSCI World Index since the fund's inception.

Performance is for the fund's Class A shares at net asset value and does not include the fund's maximum front-end sales charge of 5.00%—had it been included, the fund's return would have been lower. Results are before taxes on fund distributions and assume reinvestment of dividends and capital gains. Index data shown is from 30/11/07, since comparative index data is available only for full monthly periods. Source: State Street Corporation, Lipper, Inc. and Mellon Analytical Solutions, LLC.

ratio is a measure of a company's financial leverage, calculated as the company's debt divided by its total capital. Duration is a measure of interest rate sensitivity for fixed income securities. Information ratio is the measurement of the performance returns of a portfolio against the performance volatility of an index or benchmark. The information ratio is generally used as a gauge to measure the ability of a portfolio to generate excess returns of the index or benchmark. PEG ratio is a stock's price/earnings ratio divided by estimated earnings growth rate in the next year; a lower PEG indicates that less is being paid for each unit of earnings growth. Price/book ratio is the stock's capitalization divided by its book value. Price/earnings ratio is the current stock price over trailing 12-month earnings per share. ROIC (return on invested capital) measures how effectively a company uses the money invested in its operations, calculated as a company's net income minus any dividends divided by the company's total capital. Tracking error is a measure of the volatility of excess returns relative to a benchmark.
