

Calamos Market Neutral Income Fund

CALAMOS[®]

INVESTMENTS

MORNINGSTAR OVERALL RATING™†

Among 118 Market Neutral Funds
The fund's load-waived Class A shares had 4 stars for 3 years, 5 stars for 5 years, and 4 stars for 10 years out of 118, 70 and 27 Market Neutral funds, respectively, for the period ended 12/31/16.

OVERVIEW

The fund's core market strategies include covered call writing and convertible arbitrage, complemented by an opportunistic sleeve.

Together, these strategies intend to provide the fund with an enhanced potential for risk-managed returns due to their differing responses to volatility.

KEY FEATURES

- » **One of the first alternative mutual funds:** capitalizes on more than three decades of experience in the convertible space
- » **Low correlation with most fixed income benchmarks:** provides a means to dampen volatility
- » **Risk-management focus:** blends strategies to achieve the most appropriate risk/reward profile

PORTFOLIO FIT

The fund may provide potential diversification, in particular in a low interest-rate environment.

†Morningstar ratings shown are for load-waived shares that do not include any front-end sales load. Not all investors have access to or may invest in the load-waived share class shown. Other share classes with front-end or back-end sales charges may have different ratings than the ratings shown. Additionally, some A-share mutual funds for which Morningstar calculates a load-waived A-share star rating may not waive their front-end sales load.

There can be no assurance that the Fund(s) will achieve its investment objective.

**NOT FDIC INSURED | MAY LOSE VALUE
NO BANK GUARANTEE**

Returns in Rising Interest Rate Environments

Historically, the fund has shown the ability to manage risk over full market cycles with limited correlation to fixed income markets.

CALAMOS MARKET NEUTRAL INCOME FUND RETURNS VERSUS BLOOMBERG BARCLAYS U.S. AGGREGATE BOND INDEX CUMULATIVE RETURNS

In periods during which the 10-year Treasury yield rose more than 100 basis points, the fund outperformed the index in every time period.

Data as of 12/31/16. Rising rate environment periods from troughs to peak from January 1996 to December 2016. A basis point is equal to 1/100th of 1%.

Performance data quoted represents past performance, which is no guarantee of future results. Current performance may be lower or higher than the performance quoted. The principal value and return of an investment will fluctuate so that your shares, when redeemed, may be worth more or less than their original cost. Performance reflected at NAV does not include the Fund's maximum front-end sales load of 4.75%. Had it been included, the Fund's return would have been lower. For the most recent month-end fund performance information visit www.calamos.com.

Calendar year returns measure net investment income and capital gain or loss from portfolio investments for each period specified. Average annual total return measures net investment income and capital gain or loss from portfolio investments as an annualized average. All performance shown assumes reinvestment of dividends and capital gains distributions. The Fund also offers Class B and C Shares, the performance of which may vary. In calculating net investment income, all applicable fees and expense are deducted from the returns.

Class I shares are offered primarily for direct investment by investors through certain tax-exempt retirement plans (including 401(k) plans, 457 plans, employer-sponsored 403(b) plans, profit sharing and money purchase pension plans, defined benefit plans and non-qualified deferred compensation plans) and by institutional clients, provided such plans or clients have assets of at least \$1 million. Class I shares may also be offered to certain other entities or programs, including, but not limited to, investment companies, under certain circumstances.

Bond credit quality allocation reflects the higher of the ratings of Standard & Poor's Corporation or Moody's Investors Service, Inc. Ratings are relative, subjective and not absolute standards of quality, represent the opinions of the independent, Nationally Recognized Statistical Rating Organizations (NRSRO), and are adjusted to the Standard & Poor's scale shown. Ratings are measured using a scale that typically ranges from AAA (highest) to D (lowest). In addition, CAL has assigned its own ranking to the "unrated bonds," based on its fundamental and proprietary investment process and has years of experience actively managing risk. The security's credit rating does not eliminate risk. The table excludes equity securities, cash and cash equivalents. For more information about securities ratings, please see the Fund's Statement of Additional Information at www.calamos.com. Additional information on ratings methodologies are available by visiting the NRSRO websites: www.standardandpoors.com and www.moody.com.

Covered Call Writing: As the writer of a covered call option on a security, the fund foregoes, during the option's life, the opportunity to profit from increases in the market value of the security, covering the call option above the sum of the premium and the exercise price of the call.

Convertible Securities Risk: The value of a convertible security is influenced by changes in interest rates, with investment value declining as interest rates increase and increasing as interest rates decline. The credit standing of the issuer and other factors also may have an effect on the convertible security's investment value.

Convertible Hedging Risk: If the market price of the underlying common stock increases above the conversion price on a convertible security, the price of the convertible security will increase. The fund's increased liability on any outstanding short position would, in whole or in part, reduce this gain.

The principal risks of investing in the Market Neutral Income Fund include: equity securities risk consisting of market prices declining in general, convertible securities risk consisting of the potential for a decline in value during periods of rising interest rates and the risk of the borrower to miss payments, synthetic convertible instruments risk, convertible hedging risk, covered call writing risk, options risk, short sale risk, interest rate risk, credit risk, high yield risk, liquidity risk, portfolio selection risk, and portfolio turnover risk.

As a result of political or economic instability in foreign countries, there can be special risks associated with investing in foreign securities, including fluctuations in currency exchange rates, increased price volatility and difficulty obtaining information. In addition, emerging markets may present additional risk due to potential for greater economic and political instability in less developed countries.

Before investing carefully consider the fund's investment objectives, risks, charges and expenses. Please see the prospectus and summary prospectus containing this and other information or call 1-800-582-6959. Read it carefully before investing.

NOTES (ALPHABETICAL)

Annualized Standard Deviation is a statistical measure of the historical volatility of a mutual fund or portfolio, usually computed using 36 monthly returns. **Bloomberg Barclays U.S. Aggregate Bond Index** covers the U.S.-denominated, investment-grade, fixed-rate, taxable bond market of SEC registered securities. The index includes bonds from the Treasury, Government-Related, Corporate, MBS (agency fixed-rate and hybrid ARM pass throughs), ABS, and CMBS sectors. **Bloomberg Barclays U.S. Government/Credit Index** comprises long-term government and investment grade corporate debt securities and is generally considered representative of the performance of the broad U.S. bond market. Unlike convertible bonds, U.S. Treasury bills are backed by the full faith and credit of the U.S. government and offer a guarantee as to the timely repayment of principal and interest. **Citigroup 30-Day T-Bill Index** is generally considered representative of the performance of short-term money market instruments. **Morningstar Market Neutral Category** represent funds that attempt to eliminate the risks of the market by holding 50% of assets in long positions in stocks and 50% of assets in short positions.

Morningstar Ratings™ are based on risk-adjusted returns and are through 12/31/16 for Class A shares and will differ for other share classes. Morningstar Ratings based on a risk-adjusted return measure that accounts for variation in a fund's monthly historical performance (reflecting sales charges), placing more emphasis on downward variations and rewarding consistent performance. Within each asset class, the top 10%, the next 22.5%, 35%, 22.5%, and the bottom 10% receive 5, 4, 3, 2, or 1 star, respectively. Each fund is rated exclusively against U.S. domiciled funds. The information contained herein is proprietary to Morningstar and/or its content providers; may not be copied or distributed; and is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Source: © 2017 Morningstar, Inc. All Rights Reserved.

Unmanaged index returns assume reinvestment of any and all distributions and, unlike fund returns, do not reflect fees, expenses or sales charges. Investors cannot invest directly in an index.

Important Risk Information. An investment in the Fund(s) is subject to risks, and you could lose money on your investment in the Fund(s). Your investment in the Fund(s) is not a deposit in a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation (FDIC) or any other government agency. The risks associated with an investment in the Fund(s) can increase during times of significant market volatility. The Fund(s) also has specific principal risks, which are described below. More detailed information regarding these risks can be found in the Fund's prospectus.

Portfolios are managed according to their respective strategies which may differ significantly in terms of security holdings, industry weightings, and asset allocation from those of the benchmark(s). Portfolio performance, characteristics and volatility may differ from the benchmark(s) shown.
