Strategy Overview

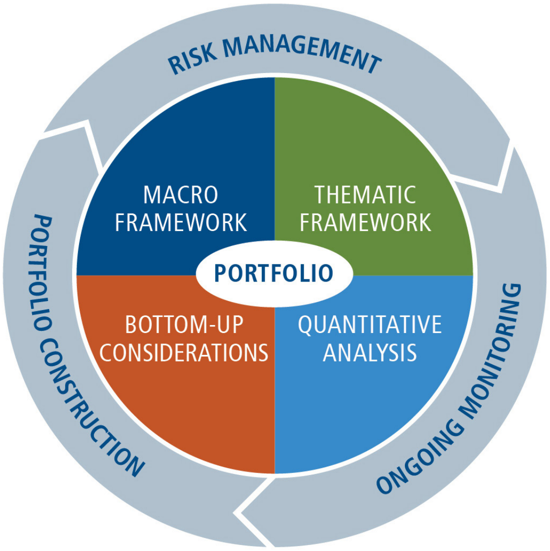
A growth-oriented emerging market equity strategy that invests in emerging market-domiciled companies and seeks to outperform the MSCI Emerging Markets Index over a full market cycle.

Key Differentiators

- Managing global assets since the 1980s
- Fundamental research, top-down thematic
- Capital structure analysis
- High active share, high conviction
- Focus on risk-adjusted alpha

Investment Process

The strategy's investment process incorporates top-down, macroeconomic analysis and bottom-up research. Our Investment Committee, Co-CIOs and research professionals provide the broad macroeconomic and thematic framework as well as perspective on global risk factors and investment opportunities. Our research analysts leverage quantitative tools to narrow the opportunity set and conduct fundamental research to value the securities within a company's capital structure. They establish risk and return expectations through cash flow return on investment (CFROI) and discounted cash flow (DCF) analysis. To build higher conviction in investment candidates and holdings, and to stay abreast of industry fundamentals, the investment team travels extensively—meeting with company management, suppliers and competitors. This strategy typically will comprise an all-cap, higher quality and higher conviction portfolio. We expect alpha contributions from security selection and top-down positioning, while maintaining index-like beta.



Calamos Emerging Market Equity Strategy

Calamos Emerging Market Equity Strategy

Past performance does not guarantee or indicate future results. Current performance may be lower or higher than the performance quoted. Portfolios are managed according to their respective strategies which may differ significantly in terms of security holdings, industry weightings, and asset allocation from those of the benchmark(s). Portfolio performance, characteristics and volatility may differ from the benchmark(s) shown.

The results portrayed on the preceding pages are for the Calamos Emerging Market Equity Composite. Representative holdings and portfolio characteristics are specific only to the portfolio shown at that point in time. Other portfolios will vary in composition, characteristics, and will experience different investment results. The representative portfolio shown has been selected by the advisor based on account characteristics that the advisor feels accurately represents the investment strategy as a whole.

The **Calamos Emerging Market Equity Composite** is an actively managed composite investing predominantly in common stocks of emerging market domiciled companies. Under normal market conditions, portfolios in the strategy will invest at least 80% of net assets in equity issuers whose principle activities are in a developing market or economically tied to a developing market country. The Composite was created December 1, 2013 calculated with an inception date of December 1, 2013 and includes all fully discretionary fee paying accounts, including those no longer with the Firm.

Fees include the investment advisory fee charge by Calamos Advisors LLC. Returns greater than 12 months are annualized. Chart Data Sources: Mellon Analytical Solutions LLC and Calamos Advisors LLC.

The **MSCI Emerging Markets Index** is a free float-adjusted market capitalization index that is designed to measure equity market performance of emerging markets. The index is calculated without dividends, with net or with gross dividends reinvested, in both US dollars and local currencies. Unmanaged index returns assume reinvestment of any and all distributions and do not reflect any fees, expenses or sales charges. Investors cannot invest directly in an index.

The information in this report should not be considered a recommendation to purchase or sell any particular security. There is no assurance that any securities discussed herein will remain in an account's portfolio at the time you receive this report or that securities sold have not been repurchased. The securities discussed do not represent the account's entire portfolio and in the aggregate may represent only a small percentage of an account's portfolio holdings.
