

Calamos High Income Opportunities Fund*

FUND OVERVIEW

Through its multi-sector fixed income strategy, the fund invests mainly in high yield securities from U.S. issuers with the goal of generating a high level of current income and total return, which provides consistent excess returns above the benchmark over full market cycles.

KEY FEATURES

- » We construct the portfolio bond-by-bond with a focus on being well compensated for risks taken. We believe a disciplined process, grounded in fundamental research, enables us to achieve higher total returns with less volatility.
- » A broader investable universe enhances portfolio construction and risk management. Expanding the universe to include bank loans and preferred securities provides additional opportunities.
- » We conduct robust, independent credit research. Our fixed income investment process unites quantitative and qualitative analyses into historical and forward-looking models. The result is a credit rating reflective of where a company is heading.
- » We apply a macro overlay to capitalize on opportunities in misunderstood industries and sectors. The overlay acts as a risk control that also considers the business cycle, geopolitical factors, inflation and real rate expectations.

PORTFOLIO FIT

The fund can complement investment-grade credit exposure, providing attractive income and total return potential for more risk-tolerant investors.

High Yield Outperformed in Rising Interest Rate Environments

CUMULATIVE BOND RETURNS

In periods during which the 10-year Treasury yield rose more than 100 basis points, high yield bonds outperformed investment grade and government bonds.

Source: Morningstar and Bloomberg

Data as of 9/30/18. Rising rate environment periods from troughs to peak from October 1993 to May 2018.

The indexes shown are not intended as proxies for the Fund's actual performance, and there are significant differences between the Fund and the indexes. Unmanaged index returns assume reinvestment of any and all distributions and, unlike fund returns, do not reflect fees, expenses or sales charges. Investors cannot invest directly in an index. The bonds represented in the above chart have varying price risk, which generally is higher for issuers that are more likely to default. U.S. Treasuries are backed by the U.S. government and have a very low probability of default. U.S. corporate investment grade bonds, represented by the ICE BofAML U.S. Corporate Master Index, are securities that have a higher probability of default than the U.S. government given the higher probability of corporate bankruptcy. High yield bonds, represented by the ICE BofAML U.S. High Yield Master II Index, are issued by corporate issuers that have lower credit ratings than investment-grade issuers and therefore are considered more likely to default.

Performance data quoted represents past performance, which is no guarantee of future results. Current performance may be lower or higher than the performance quoted. The principal value and return of an investment will fluctuate so that your shares, when redeemed, may be worth more or less than their original cost. Performance reflected at NAV does not include the Fund's maximum front-end sales load of 2.25%. Had it been included, the Fund's return would have been lower. For the most recent month-end fund performance information visit www.calamos.com.

CALENDAR YEAR RETURNS (%)

YTD 2018	2017	2016	2015	2014	2013	2012	2011	2010	2009	
Calamos High Income Opportunities Fund A Shares - at NAV	2.48%	6.05%	11.93%	-4.65%	0.84%	6.12%	11.23%	4.10%	10.75%	46.52%

Calendar year returns measure net investment income and capital gain or loss from portfolio investments for each period specified. Average annual total return measures net investment income and capital gain or loss from portfolio investments as an annualized average. All performance shown assumes reinvestment of dividends and capital gains distributions. The Fund also offers Class C shares, the performance of which may vary. In calculating net investment income, all applicable fees and expenses are deducted from the returns.

Class I shares are offered primarily for direct investment by investors through certain tax-exempt retirement plans (including 401(k) plans, 457 plans, employer-sponsored 403(b) plans, profit sharing and money purchase pension plans, defined benefit plans and non qualified deferred compensation plans) and by institutional clients, provided such plans or clients have assets of at least \$1 million. Class I shares may also be offered to certain other entities or programs, including, but not limited to, investment companies, under certain circumstances.

Portfolios are managed according to their respective strategies which may differ significantly in terms of security holdings, industry weightings, and asset allocation from those of the benchmark(s). Portfolio performance, characteristics and volatility may differ from the benchmark(s) shown.

NOTES

Annualized standard deviation is a statistical measure of the historical volatility of a mutual fund or portfolio, usually computed using 36 monthly returns. Average effective duration provides a measure of the Fund's interest rate sensitivity—the longer a fund's duration, the more sensitive it is to shifts in interest rates. Average effective maturity is the weighted average of the maturities in a portfolio of bonds. Beta is a historic measure of a fund's relative volatility, which is one of the measures of risk; a beta of 0.5 reflects 1/2 the market's volatility as represented by the Fund's primary benchmark, while a beta of 2.0 reflects twice the volatility. Option adjusted spread is the yield spread which has to be added to a benchmark yield curve to discount a security's payments to match its market price; uses a dynamic pricing model that accounts for embedded options and is usually measured in basis points. 30-Day SEC yield reflects the dividends and interest earned by the Fund during the 30-day period ended as of the date stated after deducting the Fund's expenses for that same period. Yield-to-worst is the lowest potential yield that can be received on a bond without the issuer actually defaulting. The Bloomberg Barclays U.S. High Yield 2% Issuer Capped Index measures the performance of high yield corporate bonds with a maximum allocation of 2% to any one issuer. The ICE BofAML BB-B U.S. High Yield Constrained Index contains all securities in the ICE BofAML U.S. High Yield Index rated BA1 through B3, based on an average of Moody's, S&P and Fitch, but caps issuer exposure at 2%. Index constituents are capitalization-weighted, based on their current amount outstanding, provided the total allocation to an individual issuer does not exceed 2%. Morningstar High Yield Bond Category represents funds with at least 65% of assets in bonds rated below BBB. 30-Day SEC Yield reflects the dividends and interest earned by the Fund during the 30-day period ended as of the date stated after deducting the Fund's expenses for that same period. The Fund's investment advisor has contractually agreed to reimburse Fund expenses through March 1, 2020 to the extent necessary so that Total Annual Fund Operating Expenses (excluding taxes, interest, short interest, short dividend expenses, brokerage commissions, acquired fund fees and expenses, and extraordinary expenses, if any) of Class A, Class C and Class I shares are limited to 1.00%, 1.75% and 0.75% of average net assets, respectively. Calamos Advisors may recapture previously waived expense amounts within the same fiscal year for any day where the respective Fund's expense ratio falls below the contractual expense limit up to the expense limit for that day.

Important Risk Information. An investment in the Fund(s) is subject to risks, and you could lose money on your investment in the Fund(s). There can be no assurance that the Fund(s) will achieve its investment objective. Your investment in the Fund(s) is not a deposit in a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation (FDIC) or any other government agency. The risks associated with an investment in the Fund(s) can increase during times of significant market volatility. The Fund(s) also has specific principal risks, which are described below. More detailed information regarding these risks can be found in the Fund's prospectus.

The principal risks of investing in the Fund include: high yield risk consisting of increased credit and liquidity risks, convertible securities risk consisting of the potential for a decline in value during periods of rising interest rates and the risk of the borrower to miss payments, synthetic convertible instruments risk, interest rate risk, credit risk, liquidity risk, portfolio selection risk and foreign securities risk.

The Fund's fixed income securities are subject to interest rate risk. If rates increase, the value of the Fund's investments generally declines. Owning a bond fund is not the same as directly owning fixed income securities. If the market moves, losses will occur instantaneously, and there will be no ability to hold a bond to maturity.

CREDIT QUALITY ALLOCATION OF BONDS [‡]	FUND %
AAA	0.0
AA	0.0
A	0.0
BBB	7.3
BB	36.4
B	42.0
CCC and Below	10.2
Unrated Securities	4.1

Bond credit quality allocation reflects the higher of the ratings of Standard & Poor's Corporation, Moody's Investors Service, Inc. Ratings are relative, subjective and not absolute standards of quality, represent the opinions of the independent, Nationally Recognized Statistical Rating Organizations (NRSRO), and are adjusted to the Standard & Poor's scale shown. Ratings are measured using a scale that typically ranges from AAA (highest) to D (lowest). The security's credit rating does not eliminate risk. The table excludes equity securities, cash and cash equivalents. For more information about securities ratings, please see the Fund's Statement of Additional Information at www.calamos.com. Additional information on ratings methodologies are available by visiting the NRSRO websites: www.standardandpoors.com, www.moody's.com.

As a result of political or economic instability in foreign countries, there can be special risks associated with investing in foreign securities, including fluctuations in currency exchange rates, increased price volatility and difficulty obtaining information. In addition, emerging markets may present additional risk due to potential for greater economic and political instability in less developed countries.

Before investing carefully consider the fund's investment objectives, risks, charges and expenses. Please see the prospectus and summary prospectus containing this and other information which can be obtained by calling 1-800-582-6959. Read it carefully before investing.
