Additionally, Calamos Investments today announced Calamos Global Dynamic Income Fund (Nasdaq: CHW) has transitioned from a managed distribution to a level distribution plan effective as of March 31, 2020.

Under the new level distribution policy, CHW intends to continue its current practice of making monthly distributions to shareholders, at a constant and fixed (but not guaranteed) rate currently set at 7.00 cents per share.

Calamos Investments believes this policy will allow CHW to maintain stable, consistent and predictable rates of distribution that are sustainable over the long-term. However, there can be no guarantee that the level distribution policy will be successful in achieving its goals. The Fund's ability to maintain a stable level of distributions to shareholders will depend on a number of factors, including changes in the financial market, market interest rates, and performance of overall equity, convertible and fixed income markets. As portfolio and market conditions change, the ability of the Fund to continue to make distributions in accordance with the level distribution policy may be affected.

Regarding the Calamos Global Total Return Fund, and Calamos Global Dynamic Income Fund: Based on our current estimates, we anticipate that following amounts are approximately paid from ordinary income, capital gains and return of capital:

Distribution Components	CGO	CHW
Ordinary Income	\$0.1000	\$0.0700
Long-Term Capital Gains	\$0.0000	\$0.0000
Return of Capital	\$0.0000	\$0.0000
Total Distribution (Level Rate)	\$0.1000	\$0.0700

Regarding Calamos' remaining five closed-end funds, which operate under a managed distribution policy: The information below is required by an exemptive order granted to the Funds by the U.S. Securities and Exchange Commission and includes the information sent to shareholders regarding the sources of the Funds' distributions.

The following table sets forth the estimated amount of the sources of distribution for purposes of Section 19 of the Investment Company Act of 1940, as amended, and the related rules adopted thereunder. The Funds estimate the following percentages, of their respective total distribution amount per common share, attributable to (i) current and prior fiscal year net investment income, (ii) net realized short-term capital gain, (iii) net realized long-term capital gain and (iv) return of capital or other capital source as a percentage of the total distribution amount. These percentages are disclosed for the current distribution as well as the fiscal year-to-date cumulative distribution amount per common share for the Funds.

Note: NAV returns are as of March 31, 2020 and Distribution Returns include the distribution announced today.

You should not draw any conclusions about the Fund's investment performance from the amount of this distribution or from the terms of the Fund's plan.

If the Fund(s) estimate(s) that it has distributed more than its income and capital gains, a portion of your distribution may be a return of capital. A return of capital may occur, for example, when some or all of the money that you invested in the Fund is paid back to you. A return of capital distribution does not necessarily reflect the Fund's investment performance and should not be confused with 'yield' or 'income'.

The amounts and sources of distributions reported in this 19(a) notice are only estimates and are not being provided for tax reporting purposes. The actual amounts and sources of the amounts for accounting and tax purposes will depend upon the Fund's investment experience during the remainder

of its fiscal year and may be subject to changes based on tax regulations. The Fund will send you a Form 1099 DIV for the calendar year that will tell you how to report these distributions for federal income tax purposes.

Return figures provided below are based on the change in the Fund's Net Asset Value per share ("NAV"), compared to the annualized distribution rate for this current distribution as a percentage of the NAV on the last day of the month prior to distribution record date.

Fund	Annualized			
	5-Year NAV Return ⁽¹⁾	Fiscal YTD NAV Dist Rate	Fiscal YTD NAV Return	Fiscal YTD NAV Dist Rate
CHI	2.29%	11.09%	-15.24%	5.54%
CHY	2.09%	11.18%	-14.99%	5.59%
CSQ	5.19%	10.38%	-18.78%	5.19%
CCD	2.28%	12.33%	-14.77%	6.17%
CPZ	-19.14%	4.68%	-19.14%	2.34%

Note: NAV returns are as of March 31, 2020 and Distribution Returns include the distribution announced today.

While the NAV performance may be indicative of the Fund's investment performance, it does not measure the value of a shareholder's investment in the Fund. The value of a shareholder's investment in the Fund is determined by the Fund's market price, which is based on the supply and demand for the Fund's shares in the open market. Past performance does not guarantee future results.

Monthly distributions offer shareholders the opportunity to accumulate more shares in a fund via the automatic dividend reinvestment plan. For example, if a fund's shares are trading at a premium, distributions will be automatically reinvested through the plan at NAV or 95% of the market price, whichever is greater; if shares are trading at a discount, distributions will be reinvested at the market price through an open market purchase program. Thus, the plan offers current shareholders an efficient method of accumulating additional shares with a potential for cost savings. Please see the dividend reinvestment plan for more information.

Important Notes about Performance and Risk

Past performance is no guarantee of future results. As with other investments, market price will fluctuate with the market and upon sale, your shares may have a market price that is above or below net asset value and may be worth more or less than your original investment. Returns at NAV reflect the deduction of the Fund's management fee, debt leverage costs and other expenses. You can purchase or sell common shares daily. Like any other stock, market price will fluctuate with the market.

Upon sale, your shares may have a market price that is above or below net asset value and may be worth more or less than your original investment. Shares of closed-end funds frequently trade at a discount which is a market price that is below their net asset value.
