**Calamos Launches S&P 500<sup>®</sup> Structured Alt Protection ETF<sup>™</sup> - May (CPSM),  
Announces 9.81% Upside Cap Rate with 100% Downside Protection Over One Year**

- *CPSM's 9.81% cap compares favorably with the 8%, 20-year average price return of the S&P 500.*
- *The Calamos Structured Protection suite combines Calamos' decades-long alternatives and options investing expertise within the liquid, cost-effective, tax-efficient ETF structure.*

**Metro Chicago, Illinois, May 1, 2024** – [Calamos Investments LLC](#) (“Calamos”), a leading alternatives manager, today announced the launch of the [Calamos S&P 500<sup>®</sup> Structured Alt Protection ETF<sup>™</sup> – May](#) (ticker: CPSM) with a 9.81% cap rate before fees and expenses from May 1, 2024 through April 30, 2025. CPSM marks the first of 12 ETFs in the [Calamos Structured Protection ETFs<sup>™</sup>](#) series which will offer investors protected exposure to the S&P 500, Nasdaq-100 and Russell 2000.

“Calamos has been engineering alternative investment strategies for nearly 50 years. Our focus is to deliver unique, innovative, risk-managed solutions easily accessible by all investors,” said [John Koudounis](#), President and CEO of Calamos Investments. “Continuing to build on this heritage, we are thrilled to introduce CPSM to our clients, the first of [Calamos Structured Protection ETFs<sup>™</sup>](#).”

Calamos S&P 500 <sup>®</sup> Structured Alt Protection ETF <sup>™</sup> – May	
Launch Date	5/1/2024
Ticker	CPSM
Cap Rate	9.81%
Outcome Period	1 Year: 5/1/2024 to 4/30/2025
Reference Asset	Price return of the SPDR <sup>®</sup> S&P 500 <sup>®</sup> ETF Trust (SPY)
Structured Protection	100% downside protection if held through the one-year outcome period
Annual Expense Ratio	0.69%
Portfolio Management	Co-CIO <a href="#">Eli Pars</a> and team
Benchmarks	S&P 500 Price Index MerQube Capital Protected US Large Cap Index – May

CPSM will reset annually, offering investors a new upside cap with refreshed protection against negative returns of the S&P 500 over the subsequent 12-month period. If shares are held longer than one year, CPSM can deliver significant tax alpha as gains will grow tax deferred and will be taxed at long-term capital gains rates. Shares of CPSM can be held indefinitely.

Learn more about Calamos S&P 500 Structured Alt Protection ETF<sup>™</sup> – May and the full suite of [Calamos Structured Protection ETFs<sup>™</sup>](#) including the forthcoming ETFs providing exposure to the Nasdaq-100 and Russell 2000 (with initial expected launches in June and July, respectively).

*The information in each fund's prospectus and statement of additional information) is not complete and may be changed. We may not sell the securities of any fund until such fund's registration statement filed with the Securities and Exchange Commission is effective. Each fund's prospectus and statement of additional information is not an offer to sell such fund's securities and is not soliciting an offer to buy such fund's securities in any state where the offer or sale is not permitted.*

***Before investing, carefully consider the fund's investment objectives, risks, and charges and expenses. Please see the prospectus and summary prospectus containing this and other information which can be obtained by calling 1-866-363-9219. Read it carefully before investing.***

Calamos Investments LLC, referred to herein Calamos is a financial services company offering such services through its subsidiaries: Calamos Advisors LLC, Calamos Wealth Management LLC, Calamos Investments LLP, and Calamos Financial Services LLC.

**An investment in the Fund(s) is subject to risks, and you could lose money on your investment in the Fund(s).** There can be no assurance that the Fund(s) will achieve its investment objective. Your investment in the Fund(s) is not a deposit in a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation (FDIC) or any other government agency. The risks associated with an investment in the Fund(s) can increase during times of significant market volatility. The Fund(s) also has specific principal risks, which are described below. More detailed information regarding these risks can be found in the Fund's prospectus.

**Investing involves risks. Loss of principal is possible.** The Fund(s) face numerous market trading risks, including authorized participation concentration risk, cap change risk, capital protection risk, capped upside risk, cash holdings risk, clearing member default risk, correlation risk, derivatives risk, equity securities risk, investment timing risk, large-capitalization investing risk, liquidity risk, market maker risk, market risk, non-diversification risk, options risk, premium-discount risk, secondary market trading risk, sector risk, tax risk, trading issues risk, underlying ETF risk and valuation risk. For a detailed list of fund risks see the prospectus.

**There are no assurances the Fund(s) will be successful in providing the sought-after protection. The outcomes that the Fund(s) seeks to provide may only be realized if you are holding shares on the first day of the outcome period and continue to hold them on the last day of the outcome period, approximately one year. There is no guarantee that the outcomes for an outcome period will be realized or that the Fund(s) will achieve its investment objective. If the outcome period has begun and the underlying ETF has increased in value, any appreciation of the Fund(s) by virtue of increases in the underlying ETF since the commencement of the outcome period will not be protected by the sought-after protection, and an investor could experience losses until the underlying ETF returns to the original price at the commencement of the outcome period. Fund shareholders are subject to an upside return cap (the "Cap") that represents the maximum percentage return an investor can achieve from an investment in the fund(s) for the outcome period, before fees and expenses. If the outcome period has begun and the Fund(s) have increased in value to a level near to the Cap, an investor purchasing at that price has little or no ability to achieve gains but remains vulnerable to downside risks. Additionally, the Cap may rise or fall from one outcome period to the next. The Cap, and the Fund(s) position relative to it, should be considered before investing in the Fund(s). The Fund(s) website, [www.calamos.com](http://www.calamos.com), provides important Fund information as well information relating to the potential outcomes of an investment in the Fund(s) on a daily basis.**

The Fund(s) are designed to provide point-to-point exposure to the price return of the reference asset via a basket of Flex Options. As a result, the ETFs are not expected to move directly in line with the reference asset during the interim period. Investors purchasing shares after an outcome period has begun may experience very different results than fund's investment objective. Initial outcome periods are approximately 1-year beginning on the fund's inception date. Following the initial outcome period, each subsequent outcome period will begin on the first day of the month the fund was inceptioned. After the conclusion of an outcome period, another will begin.

**FLEX Options Risk** – The Fund(s) will utilize FLEX Options issued and guaranteed for settlement by the Options Clearing Corporation (OCC). In the unlikely event that the OCC becomes insolvent or is otherwise unable to meet its settlement obligations, the Fund(s) could suffer significant losses. Additionally, FLEX Options may be less liquid than standard options. In a less liquid market for the FLEX Options, the Fund(s) may have difficulty closing out certain FLEX Options positions at desired times and prices. The values of FLEX Options do not increase or decrease at the same rate as the reference asset and may vary due to factors other than the price of reference asset. Shares are bought and sold at market price, not net asset value (NAV), and are not individually redeemable from the fund. NAV represents the value of each share's portion of the fund's underlying assets and cash at the end of the trading day. Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where fund shares are listed.

100% capital protection is over a one-year period before fees and expenses. All caps are pre-determined.

**Cap Rate** – Maximum percentage return an investor can achieve from an investment in the Fund if held over the Outcome Period. Cap range depicted is the high and low cap rate over the past 15 trading days. Actual cap delivered by the Fund may be different.

**Protection Level** – Amount of protection the Fund is designed to achieve over the Days Remaining.

**Outcome Period** – Number of days in the Outcome Period.

Data as of 3/31/24.
