PRINCIPAL RISKS

- > The value of companies invested in, and therefore the value of the fund will rise and fall, and there is no guarantee that you will get your investment back. An investment in the fund should only be made by those persons who are able to sustain a loss on their investment. The Shares should be viewed as long term investments (at least 5 years).
- > ESG Investing Risks: When the investment process considers environmental, social and governance factors, the adviser may choose to avoid investments that might otherwise be considered, or sell investments due to changes in ESG risk factors as part of the overall investment decision process. The use of environmental, social and governance factors may impact investment exposure to issuers, industries, sectors, and countries, which may impact a portfolio's relative performance.
- > Equity Securities Risk: The securities markets are volatile, and the market prices of the securities may decline generally. The price of equity securities fluctuates based on changes in a company's financial condition and overall market and economic conditions. If the market prices of the securities owned fall, the value of your investment will decline.
- > If you are unsure about the suitability of the fund for you, please seek professional advice.
- > Past performance is not a guide to future performance.
