

Calamos CEF Income & Arbitrage ETF (Ticker: CCEF)

Designed to deliver high monthly income

CCEF is actively managed and seeks to pay high current income monthly.

Capital appreciation through discounted closed-end funds

Invests in closed-end funds trading at steep discounts to unlock the potential for capital appreciation.

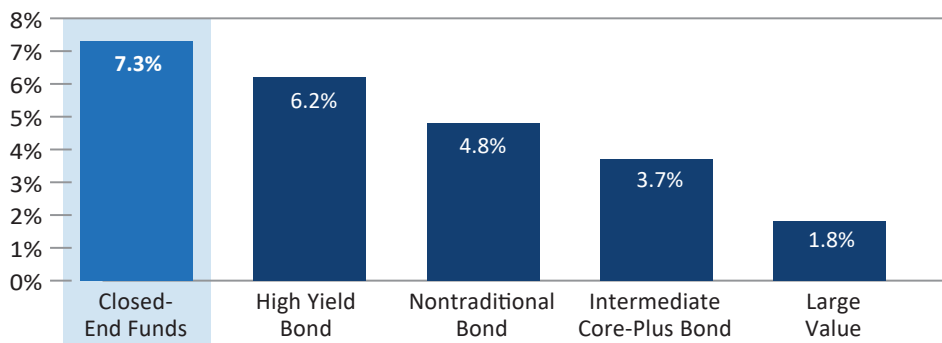

Two decades of closed-end fund expertise

Calamos is a longstanding participant of the closed-end fund market.

THE CCEF ADVANTAGE: SOURCING HIGHER DISTRIBUTIONS

Closed-end fund 2023 distributions exceeded ETF and mutual fund categories often thought of as “yield” producing.

Source: Morningstar Direct as of 12/31/23. **Past performance is no guarantee of future results.** The performance of the Fund will differ, and many vary materially from that of any index. There is no assurance the Fund will achieve or maintain its investment objective. Closed-end fund data represents all US listed closed-end funds. The other category data represents all US investments in each respective Morningstar open end category, which includes mutual funds and ETFs.

THE DISCOUNT FACTOR: SEARCHING FOR POTENTIAL ALPHA FROM CLOSED-END FUND MARKET INEFFICIENCIES

Closed-end funds discounts are currently at historic lows. CCEF invests in funds with attractive discounts to their NAV to potentially capture capital appreciation.

Source: Morningstar as of 12/31/2023. These stats are based on the median of all US listed CEFs. **Past performance is not indicative of future results.** The performance of the Fund will differ, and many vary materially from that of any index. There is no assurance the Fund will achieve or maintain its investment objective. Closed-end fund data represents all US listed closed-end funds. The other category data represents all US investments in each respective Morningstar open end category, which includes mutual funds and ETFs.

OVERVIEW

The Calamos CEF Income & Arbitrage ETF (CCEF) seeks to deliver high monthly income and capital appreciation by investing in income-producing closed-end funds trading at attractive discounts.

PORTFOLIO FIT

- » **For high yield allocations,** seeking to unlock enhanced distributions with total return
- » **For large value allocations,** where dividend producing funds reside, aiming to deliver complementary alpha without sacrificing total return
- » **For potential alpha,** as a complement to core equity allocation

CCEF: Calamos CEF Income & Arbitrage ETF

CCEF INVESTMENT PROCESS AND PORTFOLIO CONSTRUCTION APPROACH

We utilize multiple return drivers such as analysis of historical CEF discounts to produce returns and identify select closed-end funds with the potential to deliver high monthly income and capital appreciation.

	RESEARCH PROCESS	PORTFOLIO CONSTRUCTION
Our Approach	<ul style="list-style-type: none">» Quantitative process identifies historical discounts in the closed-end fund universe» Qualitative process reviews discount evaluates why each closed-end fund is priced lower than the intrinsic value	<ul style="list-style-type: none">» Top-down asset allocation overlays Calamos' economic and asset class views» Applies levers for alpha such as event research and trading

HOW TO INVEST IN CCEF?

CCEF is available on most trading platforms or anywhere you trade US equities. Investment professionals can contact Calamos at 866.363.9219 to learn more.

Before investing carefully consider the fund's investment objectives, risks, charges and expenses. Please see the prospectus and summary prospectus containing this and other information which can be obtained by calling 1-866-363-9219 Read it carefully before investing.

An investment in the Fund(s) is subject to risks, and you could lose money on your investment in the Fund(s). There can be no assurance that the Fund(s) will achieve its investment objective. Your investment in the Fund(s) is not a deposit in a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation (FDIC) or any other government agency. The risks associated with an investment in the Fund(s) can increase during times of significant market volatility. The Fund(s) also has specific principal risks, which are described below. More detailed information regarding these risks can be found in the Fund's prospectus.

Risks of investing in the Fund include risks associated with (1) the Fund's investment in closed-end fund shares; (2) the closed-end funds' investments; and (3) any other investments of the Fund, including investments in ETFs, BDCs, and derivative instruments. The shares of closed-end funds may trade at a discount or premium to, or at, their NAV. The securities of closed-end funds may be leveraged. As a result, the Fund, may be exposed indirectly to leverage through an investment in such securities. An investment in securities of closed-end funds that use leverage may expose the Fund to higher volatility in the market value of such securities and the possibility that the Fund's long-term returns on such securities (and, indirectly, the long-term returns of its shares) will be diminished. In addition, closed-end funds are allowed to invest in a greater amount of illiquid securities than open-end mutual funds. Investments in illiquid securities pose risks related to uncertainty in valuations, volatile market prices, and limitations on resale that may have an adverse effect on the ability of the fund to dispose of the securities promptly or at reasonable prices. The Fund may invest in BDCs, which typically operate to invest in, or lend capital to, early stage-to-mature private companies as well as small public companies. The Fund's investment in shares of ETFs subjects it to the risks of owning the securities underlying the ETF, as well as the same structural risks faced by an investor purchasing shares of the Fund, including authorized participant concentration risk, market maker risk, premium-discount risk and trading issues risk. Derivatives are instruments, such as futures and forward foreign currency contracts, whose value is derived from that of other assets, rates or indices. The use of derivatives for non-hedging purposes may be considered more speculative than other types of investments.
