

# Calamos Convertible Equity Alternative ETF (Ticker: CVRT)

## Delivered by largest US Convertibles Manager<sup>1</sup>

Firm's first Convertibles ETF, delivering more than four decades of Calamos expertise.

## Targeted Exposure to Equity-Sensitive Convertibles

CVRT is the first convertible ETF that provides access to the equity-sensitive segment of the US convertibles market.

## Intelligent ETF with an Active Edge

Incorporates a rules-based approach with an active edge that seeks to capitalize on investment opportunities along the way.

### EFFICIENT ACCESS TO EQUITY-SENSITIVE CONVERTIBLES

Convertible bonds are corporate bonds that may be "convertible" into a fixed number of shares of common stock (equity). Over time, convertible bonds may exhibit bond-like or stock-like characteristics. CVRT focuses on the equity-sensitive segment of the convertibles market seeking to deliver greater upside potential over time.

### OVERVIEW

The Calamos Convertible Equity Alternative ETF (CVRT) seeks to deliver total returns through capital appreciation and current income, by investing largely in a portfolio of US convertible securities exhibiting a high level of equity sensitivity.

### PORTFOLIO FIT

- » **For convertible allocations,** CVRT may offer greater equity upside potential
- » **For equity allocations,** CVRT may provide an improved risk/reward profile and added income advantage relative to owning small and mid-cap growth stocks

*The performance of the Fund will differ, and may vary materially, from that of any index. There is no assurance the Fund will achieve or maintain its investment objective. In addition, convertible securities have unique risks not applicable to other types of securities, including that the value of convertible securities is influenced by both the yield of non-convertible securities of comparable issuers and by the value of the underlying common stock.*

You can purchase or sell common shares daily. Like any other stock, market price will fluctuate with the market. Upon sale, your shares may have a market price that is above or below net asset value and may be worth more or less than your original investment.

detailed information regarding these risks can be found in the Fund's prospectus.

**Authorized Participant Concentration Risk** – Only an Authorized Participant may engage in creation or redemption transactions directly with the Fund, and none of those Authorized Participants is obligated to engage in creation and/or redemption transactions. **Convertible Securities Risk** – The value of a convertible security is influenced by changes in interest rates, with investment value declining as interest rates increase and increasing as interest rates decline. **Debt Securities Risk** – Debt securities are subject to various risks, including interest rate risk, credit risk and default risk. **Equity Securities Risk** – The securities markets are volatile, and the market prices of the Fund's securities may decline generally. **Foreign Securities Risk** – Risks associated with investing in foreign securities include fluctuations in the exchange rates of foreign currencies that may affect the U.S. dollar value of a security, the possibility of substantial price volatility as a result of political and economic instability in the foreign country, less public information about issuers of securities, different securities regulation, different accounting, auditing and financial reporting standards and less liquidity than in U.S. markets. **High Yield Risk** – High yield securities and unrated securities of similar credit quality (commonly known as "junk bonds") are subject to greater levels of credit and liquidity risks. **New Fund Risk** – The Fund is a recently organized investment company with a limited operating history. As a result, prospective investors have a limited track record or history on which to base their investment decision. **Options Risk** – The Fund's ability to close out its position as a purchaser or seller of an over-the-counter or exchange-listed put or call option is dependent, in part, upon the liquidity of the option market. **Non-Diversification Risk** – The Fund is classified as "non-diversified" under the 1940 Act. As a result, the Fund is only limited as to the percentage of its assets which may be invested in the securities of any one issuer by the diversification requirements imposed by the Internal Revenue Code of 1986, as amended. **Portfolio Turnover Risk** – The portfolio managers may

actively and frequently trade securities or other instruments in the Fund's portfolio to carry out its investment strategies. **Small and Mid-Sized Company Risk** – Small and mid-sized company stocks have historically been subject to greater investment risk than large company stocks. **Synthetic Convertible Instruments Risk** – The value of a synthetic convertible instrument will respond differently to market fluctuations than a convertible security because a synthetic convertible instrument is composed of two or more separate securities, each with its own market value.
