

Convertible Opportunities & Income Fund (CHI)

CURRENT ANNUALIZED DISTRIBUTION RATE

9.34%*

OVERVIEW

The Fund seeks total return through a combination of capital appreciation and current income by investing in a diversified portfolio of convertible securities and below-investment-grade (high yield) fixed income securities.

KEY FEATURES

- » Aims to provide consistent income through monthly distributions set at levels the investment team believes are sustainable.
- » By investing at least 80% of its assets in convertible and non-convertible income securities, the fund provides an enhanced fixed income strategy.
- » Seeks to be less susceptible to rising interest rates than traditional fixed income funds.
- » Invests in a broad range of security types to actively manage risk/reward characteristics over full market cycles.
- » Judicious use of leverage seeks to enhance overall returns by achieving a net positive spread on investments over borrowing costs.

PORTFOLIO FIT

The fund offers an attractive monthly distribution and potential way to manage risk by employing securities that engage in upside equity movements with less downside susceptibility. It seeks to be less sensitive to interest rates by investing in lower-duration bonds.

*Current Annualized Distribution Rate is the Fund's most recent distribution, expressed as an annualized percentage of the Fund's current market price per share. Information regarding the Fund's most recent distribution can be found in the table titled "Year To Date Distribution Detail," which appears on the following page. Estimates are calculated on a tax basis rather than on a generally accepted accounting principles (GAAP) basis, but should not be used for tax reporting purposes. Distributions are subject to re-characterization for tax purposes after the end of the fiscal year. This information is not legal or tax advice. Consult a professional regarding your specific legal or tax matters. Under the Fund's level rate distribution policy, distributions paid to common shareholders may include net investment income, net realized short-term capital gains and return of capital. When the net investment income and net realized short-term capital gains are not sufficient, a portion of the level rate distribution will be a return of capital. In addition, a limited number of distributions per calendar year may include net realized long-term capital gains. Distribution rate may vary.

Fund Strategy and Role within an Asset Allocation

The fund is an enhanced fixed income offering that seeks total return through a combination of capital appreciation and current income by investing in a combination of convertible and high yield bonds. It provides an alternative to funds investing exclusively in investment-grade fixed income instruments, and it seeks to be less sensitive to interest rates by investing in lower duration asset classes.

Through active management, we optimally and dynamically position asset classes to generate capital gains and income. We believe the broader range of security types also provides increased opportunities to manage the risk/reward characteristics of the portfolio over full market cycles.

AVERAGE ANNUAL RETURNS

Average annual return measures net investment income and capital gain or loss from portfolio investments as an annualized average, assuming reinvestment of income and capital gain distributions. In calculating net investment income, all applicable fees and expenses are deducted from the returns. Calendar year returns measure net investment income and capital gain or loss from portfolio investments for each period specified.

CALENDAR YEAR RETURNS

	YTD 2019	2018	2017	2016	2015	2014	2013	2012	2011	2010
Market Price %	22.37	-12.48	22.87	14.28	-14.73	5.43	21.38	16.30	-6.33	17.27
NAV %	17.33	-3.97	14.31	10.18	-6.42	5.28	16.84	14.55	1.87	15.37

Performance data quoted represents past performance, which is no guarantee of future results. Current performance may be lower or higher than the performance quoted. The principal value of an investment will fluctuate so that your shares, when sold, may be worth more or less than their original cost. Returns at NAV reflect the deduction of the Fund's management fee, debt leverage costs and other expenses, which can be found on the next page.

You can purchase or sell common shares daily. Like any other stock, market price will fluctuate with the market. Upon sale, your shares may have a market price that is above or below net asset value and may be worth more or less than your original investment. Shares of closed-end funds frequently trade at a discount which is a market price that is below their net asset value. Please refer to following page for important notes.

Ordinary income includes net investment income and short-term capital gains. The distribution tables provided here are for informational purposes only. Estimates are calculated on a tax basis rather than on a generally accepted accounting principles (GAAP) basis, but should not be used for tax reporting purposes. Distributions may be subject to re-characterization for tax purposes after the end of the fiscal year. Individual (non-corporate) shareholders with taxable accounts will receive written notification regarding the components and tax treatment for distributions via Form 1099-DIV. If your distributions are reinvested in additional shares, you will receive a statement reflecting the reinvestment of the distribution. This information is not legal or tax advice. Consult a professional regarding your specific legal or tax matters.

¹Data is based on managed assets.

²Top 10 Holdings and Sector Weightings are calculated as a percentage of Managed Assets. The tables exclude cash or cash equivalents, any government/sovereign bonds or broad based index hedging securities the portfolio may hold.

³Leverage creates risks which may adversely affect return, including the likelihood of greater volatility of net asset value and market price of common shares; and fluctuations in the variable rates of the leverage financing. The ratio is the percent of borrowing to total assets.

⁴Credit ratings apply to the credit worthiness of the issuers of the underlying securities and not to the fund or its shares. Ratings are subject to change. Bond Credit Quality reflects the higher of the ratings of Standard & Poor's Corporation; Moody's Investors Service, Inc. Ratings are relative, subjective and not absolute standards of quality, represent the opinions of the independent Nationally Recognized Statistical Rating Organizations (NRSRO), and are adjusted to the Standard & Poor's scale shown. Ratings are measured using a scale that typically ranges from AAA (highest) to D (lowest). The security's credit rating does not eliminate risk. The table excludes equity securities, cash and cash equivalents. For more information about securities ratings, please see the Fund's Statement of Additional Information at www.calamos.com. Additional information on ratings methodologies are available by visiting the NRSRO websites: www.standardandpoors.com, www.moody.com.

⁵Interest expense and related fees on payments made to the Fund's outstanding credit facility.

outstanding) minus the sum of liabilities (other than debt representing financial leverage).

⁷Data is based on portfolio holdings.

Investments by the Fund in lower-rated securities involve substantial risk of loss and present greater risks than investments in higher rated securities, including less liquidity and increased price sensitivity to changing interest rates and to a deteriorating economic environment. Fixed income securities are subject to interest-rate risk; as interest rates go up, the value of debt securities in the Fund's portfolio generally will decline. There are certain risks associated with an investment in a convertible bond such as default risk—that the company issuing a convertible security may be unable to repay principal and interest, and interest rate risk—that the convertible may decrease in value if interest rates increase.

Terms

Managed Distribution Policy is an investment company's commitment to common shareholders to provide a predictable, but not assured, level of cash flow. NAV or Net Asset Value refers to the net value of all the assets held in the fund. IPO Price refers to the initial public offering price for shares of the fund.
