Average annual returns measure net investment income and capital gain or loss from portfolio investments as an annualized average, assuming reinvestment of income and capital gain distributions. In calculating net investment income, all applicable fees and expenses are deducted from the returns. Calendar year returns measure net investment income and capital gain or loss from portfolio investments for each period specified.

The fund also offers Class C shares, the performance of which may vary.

Class I shares are offered primarily for direct investment by investors through certain tax-exempt retirement plans and by institutional clients, provided such plans or clients have assets of at least \$1 million. For eligibility requirements and other available share classes see the prospectus and other Fund documents at www.calamos.com.

Morningstar Ratings™ are based on risk-adjusted returns and are through 12/31/23 for the share class listed and will differ for other share classes. Morningstar ratings are based on a risk-adjusted return measure that accounts for variation in a fund's monthly historical performance (reflecting sales charges), placing more emphasis on downward variations and rewarding consistent performance. Within each asset class, the top 10%, the next 22.5%, 35%, 22.5%, and the bottom 10% receive 5, 4, 3, 2 or 1 star, respectively. Each fund is rated exclusively against US domiciled funds. ¹Holdings and weightings are subject to change daily. Holdings are provided for informational purposes only and should not be deemed as a recommendation to buy or sell the securities mentioned.

²Top 10 Holdings and Sector Weightings are calculated as a percentage of net assets and exclude cash or cash equivalents, any government / sovereign bonds or broad-based index hedging securities the portfolio may hold. You can obtain a complete listing of holdings by visiting www.calamos.com. The Sector table Other row includes securities that do not have a sector classification.

³Credit quality of bonds reflects the higher of the ratings of Standard & Poor's Corp. and Moody's Investment Service Inc. Ratings are relative, subjective and not absolute standards of quality, represent the opinions of the independent, Nationally Recognized Statistical Rating Organizations (NRSRO), and are adjusted to the Standard & Poor's scale shown. Ratings are measured using a scale that typically ranges from AAA (highest) to D (lowest). The table excludes equity securities, cash and cash equivalents.

Portfolios are managed according to their respective strategies which may differ significantly in terms of security holdings, industry weightings and asset allocation from those of the benchmark(s). Portfolio performance, characteristics and volatility may differ from the benchmark(s) shown. Please refer to Important Risk Information.

Annualized standard deviation is a statistical measure of the historic volatility of a mutual fund or portfolio.

Beta is a measure of the volatility, or systematic risk, of a security or a portfolio in comparison to the market as a whole.

PEG ratio is a stock's price/earnings ratio divided by the estimated earnings growth rate in the next year; a lower PEG indicates that less is being paid for each unit of earnings growth.

Portfolio turnover is the percentage of assets in a portfolio that changed over a certain period, often a year; higher turnover indicates greater buying and selling activity.
