

Calamos Laddered S&P 500® Structured Alt Protection ETF™ (Ticker: CPSL)

Single-Ticker Solution

Access the full suite of 100% downside protection S&P 500 ETFs in a single ticker—the first of its kind.

Outcome Period Diversification

Owning all outcome periods removes timing considerations from picking a monthly entry point.

Protected Participation

Delivers upside return potential from underlying exposures to the S&P 500® with downside protection.

A SYSTEMATIC APPROACH TO INVESTING IN 100% DOWNSIDE PROTECTION ETFs

Allocate: CPSL will seek to allocate equally across 12 monthly Calamos S&P 500 Structured Protection ETFs.

Ladder: Each underlying ETF starts its outcome period on a different calendar month, creating continuously laddered exposure to 100% downside protection ETFs.

Rebalance: To maintain equal-weight allocations, the ETF will rebalance semi-annually.

OVERVIEW

The Calamos Laddered S&P 500® Structured Alt Protection ETF™ (Ticker: CPSL) is designed to provide S&P 500® equity market exposure while limiting downside risk through a laddered portfolio of underlying monthly Calamos S&P 500® Structured Alt Protection ETFs™.

CAP RATE

Captures upside exposure of SPY via the underlying ETFs, each with their individual upside cap rates.

PORTFOLIO FIT

- » **For equity risk control**, offers substantial capital protection on equity exposure for investors unwilling to risk market drawdowns.
- » **As a tax-advantage, cash alternative**, activates cash on the sidelines with equity upside potential and limited downside risk.
- » **For retirees looking to derisk**, preserves capital near or during retirement.

TRACK AND MONITOR CAP RATES & PROTECTION LEVELS

- » **Our online interactive pricing tool** provides intra-day current cap and protection levels for CPSL's underlying ETFs.
- » **Subscribe to our Weekly Rate Sheet** to be up-to-date on all Structured Protection ETFs and their cap ranges and rates.

Calamos Laddered S&P 500[®] Structured Alt Protection ETF[™] (Ticker: CPSL)

Management Fees	0.10%
Distribution and/or Service Fees (12b-1)	0.00%
Other Expenses ^{*1}	0.00%
Acquired Fund Fees and Expenses ^{*2}	0.69%
Total Annual Fund Operating Expenses ^{*3}	0.79%

* The Funds' total annual fund operating expenses as of the prospectus dated 9/9/2024 is 0.79%.

¹ "Other Expenses" is an estimate based on the expenses the Fund expects to incur for the current fiscal year.

² "Acquired Fund Fees and Expenses" include certain expenses incurred in connection with the Fund's investment in various closed-end funds, exchange-traded funds ("ETFs"), and business development companies ("BDCs"). The amount shown is based on estimated amounts for the current fiscal year.

³ The Total Annual Fund Operating Expenses in this fee table may not correlate to the expense ratios in the Fund's financial highlights and financial statements because the financial highlights and financial statements reflect only the operating expenses of the Fund and do not include Acquired Fund Fees and Expenses, which are fees and expenses incurred indirectly by the Fund through its investments in certain underlying investment companies.

Before investing carefully consider the fund's investment objectives, risks, charges and expenses. Please see the prospectus and summary prospectus containing this and other information which can be obtained by calling 1-866-363-9219 Read it carefully before investing.

An investment in the Fund(s) is subject to risks, and you could lose money on your investment in the Fund(s). There can be no assurance that the Fund(s) will achieve its investment objective. Your investment in the Fund(s) is not a deposit in a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation (FDIC) or any other government agency. The risks associated with an investment in the Fund(s) can increase during times of significant market volatility. The Fund(s) also has specific principal risks, which are described below. More detailed information regarding these risks can be found in the Fund's prospectus.

Investing involves risks. Loss of principal is possible. The Fund(s) face numerous market trading risks, including authorized participation concentration risk, cap change risk, capital protection risk, capped upside risk, cash holdings risk, clearing member default risk, correlation risk, derivatives risk, equity securities risk, investment timing risk, large-capitalization investing risk, liquidity risk, market maker risk, market risk, non-diversification risk, options risk, premium-discount risk, secondary market trading risk, sector risk, tax risk, trading issues risk, underlying ETF risk and valuation risk. For a detailed list of fund risks see the prospectus.

FUND-OF-FUNDS RISK. Shareholders of the Fund will experience investment returns that are different than the investment returns provided by an Underlying ETF. The Fund does not itself pursue a defined outcome strategy, nor does the Fund itself provide downside protection against SPY losses. Because the Fund will typically not purchase an Underlying ETF on the first day of a Target Outcome Period, it is not likely that the stated outcome of the Underlying ETF will be realized by the Fund. The Fund will be continuously exposed to the investment profiles of each of the Underlying ETFs during their respective Target Outcome Periods. The Fund, with its aggregate exposure to each of the Underlying ETFs, may have investment returns that are inferior to that of any single Underlying ETF or group of Underlying ETFs over any given time period. In between the semi-annual rebalance period of the Index, because the Fund is not equally weighted on a continuous basis, the Fund may be exposed to one or more Underlying ETFs disproportionately when compared to other Underlying ETFs. In such circumstances, the Fund will be subject to the over-weighted performance of such Underlying ETF.

HOW TO INVEST IN CPSL?

CPSL is available on most trading platforms. Investment Professionals can contact their Calamos Consultant at 866.363.9219 or visit www.calamos.com/cpsl

As a shareholder in other ETFs, the Fund bears its proportionate share of each ETF's expenses, subjecting Fund shareholders to duplicative expenses.

There are no assurances the Underlying ETFs will be successful in providing the sought-after protection. The outcomes that the Underlying ETFs seek to provide may only be realized if you are holding shares on the first day of the outcome period and continue to hold them on the last day of the outcome period, approximately one year. There is no guarantee that the outcomes for an outcome period will be realized or that the Underlying ETFs will achieve its investment objective. If the outcome period has begun and the underlying ETF has increased in value, any appreciation of the Fund(s) by virtue of increases in the underlying ETF since the commencement of the outcome period will not be protected by the sought-after protection, and an investor could experience losses until the underlying ETF returns to the original price at the commencement of the outcome period. The Underlying ETFs are subject to an upside return cap (the "Cap") that represents the maximum percentage return an investor can achieve from an investment in the fund(s) for the outcome period, before fees and expenses. If the outcome period has begun and the Underlying ETFs have increased in value to a level near to their individual Cap, an investor purchasing at that price has little or no ability to achieve gains but remains vulnerable to downside risks. Additionally, the Cap may rise or fall from one outcome period to the next. Unlike the Underlying ETFs, the Fund itself does not pursue a target outcome strategy. The protection is only provided by the Underlying ETFs and the Fund itself does not provide any stated downside protection against losses. The Fund will likely not receive the full benefit of the Underlying ETF downside protections and could have limited upside potential. The Fund's returns are limited by the caps of the Underlying ETFs.

Cap Rate – Maximum percentage return an investor can achieve from an investment in the Fund if held over the Outcome Period.

Protection Level – Amount of protection the Fund is designed to achieve over the Days Remaining.

Outcome Period – The defined length of time over which the outcomes are sought.

S&P 500 Price Index (SPX) tracks the price return of the S&P 500 Index, which is generally considered representative of the US stock market.

The **MerQube Capital Protected US Large Cap Index** provides an outcome in which the Index provides upside participation in the returns of the SPDR S&P 500 ETF (SPY) until a "cap" that is at least 1% for every 1 years. In some cases, the protection is lowered from the maximum of 100% to provide a minimum "cap" of 1%.
