

Small Cap Market Snapshot

DATA AS OF 9/30/2020

WHAT'S NEW

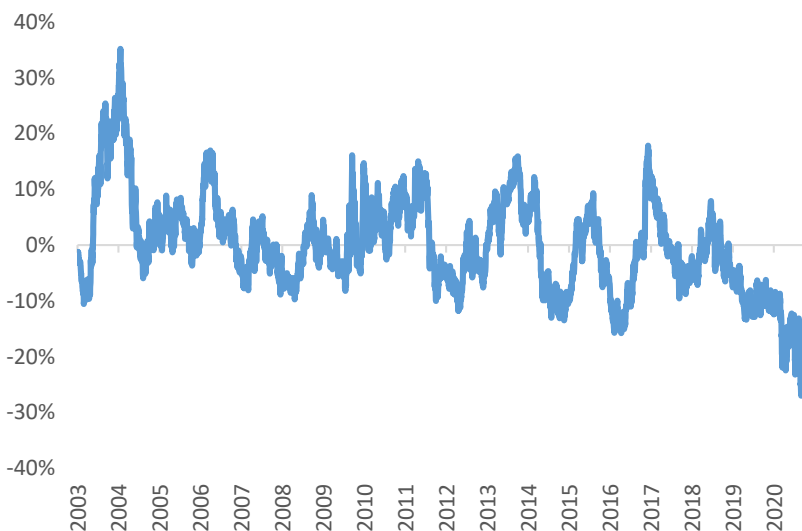

The new bull market that began in late March took a pause in September, nonetheless completing a strong quarter thanks to the July/August rally. Small caps modestly outperformed large caps during September. Small cap growth stocks outperformed large cap growth by 256 basis points. Despite this recent outperformance, relative to history, small cap growth is still significantly less expensive than large cap growth.

Last month, we made a comment about an uptick in mergers and acquisitions (M&A), which could drive small cap performance. During the June quarter, we saw only five public companies buy other public companies. During the September quarter, this number jumped to 23! The uptick in M&A is happening and is a sign of confidence by buyers. If investors aren't willing to properly value small cap stocks, expect other companies to step up and recognize that value.

Information contained herein is for informational purposes only and should not be considered investment advice. The **S&P 500** Index is a market-value weighted index consisting of 500 stocks chosen for market size, liquidity, and industry group representation. It is widely regarded as the standard for measuring U.S. stock-market performance. The **Russell 1000 Index** measures the performance of the large-cap segment of the U.S. equity universe and includes approximately 1000 of the largest securities based on a combination of their market cap and current index membership. The **Russell 2000 Index** measures the performance of the 2,000 smallest companies in the Russell 3000 Index, which represents approximately 8% of the total market capitalization of the Russell 3000 Index. You cannot invest directly in an index. The **Russell 2000 Growth Index** measures the performance of the small-cap growth segment of the U.S. equity universe. It includes those Russell 2000 companies with higher price-to-value ratios and higher forecasted growth values. The Russell 2000 Growth Index is published and maintained by FTSE Russell. The **Russell 2000 Value Index** measures the performance of small-cap value segment of the US equity universe. It includes those Russell 2000 companies with lower price-to-book ratios and lower forecasted growth values. The **Russell Microcap Index** measures the performance of the microcap segment of the U.S. equity market. Microcap stocks make up less than 3% of the U.S. equity market (by market cap) and consist of the smallest 1,000 securities in the small-cap Russell 2000® Index, plus the next 1,000 smallest eligible securities by market cap. The **Russell Microcap Growth Index** measures the performance of the microcap growth segment of the U.S. equity market. It includes Russell Microcap companies that are considered more growth oriented relative to the overall market as defined by Russell's leading style methodology. The **Russell Microcap Value Index** measures the performance of the microcap value segment of the U.S. equity market. It includes Russell Microcap companies that are considered more value oriented relative to the overall market as defined by Russell's leading style methodology.

SMALL CAP GROWTH AS A DIVERSIFIER

The portfolio effect of increasing exposure to small caps

Data from 10/1/2000 to 9/30/2020

	Annualized Return	Standard Deviation	Sharpe Ratio	Excess Return
100% LARGE CAP EQUITY S&P 500	6.42%	15.00%	0.39	0.00%
90% LARGE CAP/10% SMALL CAP GROWTH	6.49%	15.28%	0.39	0.07%
80% LARGE CAP/20% SMALL CAP GROWTH	6.56%	15.63%	0.39	0.14%
100% SMALL CAP GROWTH Russell 2000 Index	6.88%	19.80%	0.36	0.46%

The **S&P 500 Growth Index** measures growth stocks using three factors: sales growth, the ratio of earnings change to price, and momentum. S&P Style Indices divide the complete market capitalization of each parent index into growth and value segments. Constituents are drawn from the S&P 500. **Standard deviation** is a measure of volatility. **Sharpe ratio** is a calculation that reflects the reward per each unit of risk in a portfolio. The higher the ratio, the better the portfolio's risk-adjusted return is.
